WebLEDS Mobile Data System

Welcome to the Future!

WebLEDS Mobile Data System (MDS) is a complete LEDS/NCIC/NLETS application designed specifically for use in Police and Fire vehicle systems.

Designed as a complete touch screen application, **WebLEDS Mobile**, combined with an in-vehicle mounted laptop computer and wireless network card, provides deputies and support personnel with readily available access to LEDS & NCIC queries on persons, vehicles and articles. Combined with functions for inter-vehicle communications, and capabilities to instantly access DMV driving photos*, **WebLEDS Mobile** provides critical support information to officers directly at their fingertips.

WebLEDS Mobile is designed to be completely customizable by agency support personnel, allowing complete customization of LEDS Transactions, function key assignments, and screen colors. **WebLEDS Mobile** supports functions for day and night color schemes, and is completely driven thru touch-screen technology.

See how the power of **WebLEDS Mobile** can increase your officer's efficiencies, decrease unnecessary radio traffic, and provide your field personnel with the critical information they need to do their job!

*Available Soon
