

WEBLEDS PDA

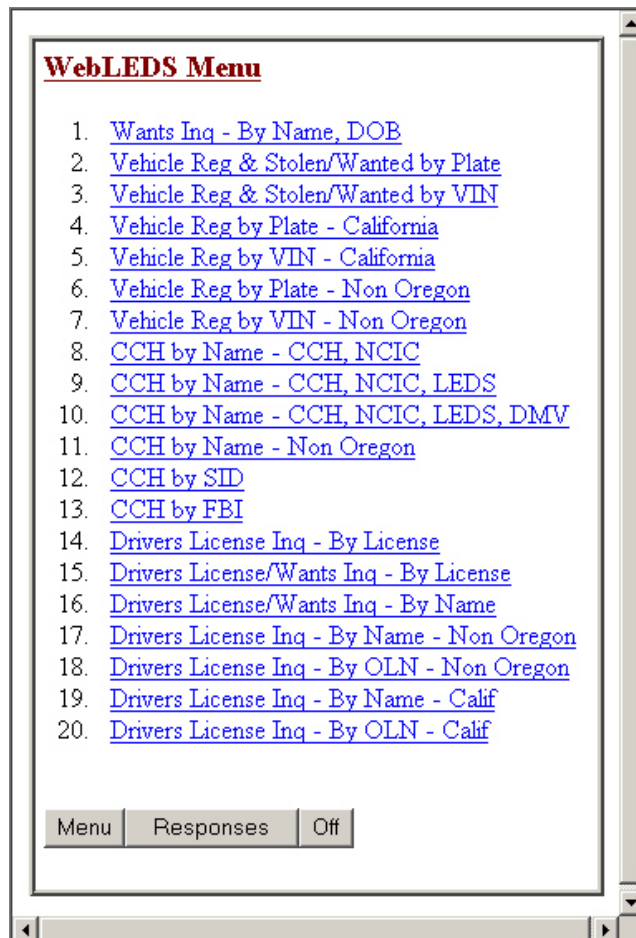

WebLEDS PDA, The module for PDA Handheld devices for complete LEDS access.

Interfaces with your existing WebLEDS system for all user account authentication information, and provides complete SSL encryption from your local server the PDA user.

No external access to your WebLEDS server is needed; all user access is via a single interface module loaded on your external Web Server.

Can be used in a Wireless environment, using GSM/GPRS cellular data services (AT&T, Sprint, Verizon, etc).
